How it evolved...

- Big Picture Vision
- Called to place a component in each elemental quadrant
- Kept being called to do it with every creation
- Guidance about moving it section forward each week

Moved from...

- Linear Manifestation
- To Fractal Manifestation
- Open for a transmission
- Open to receive
- Open to discovery

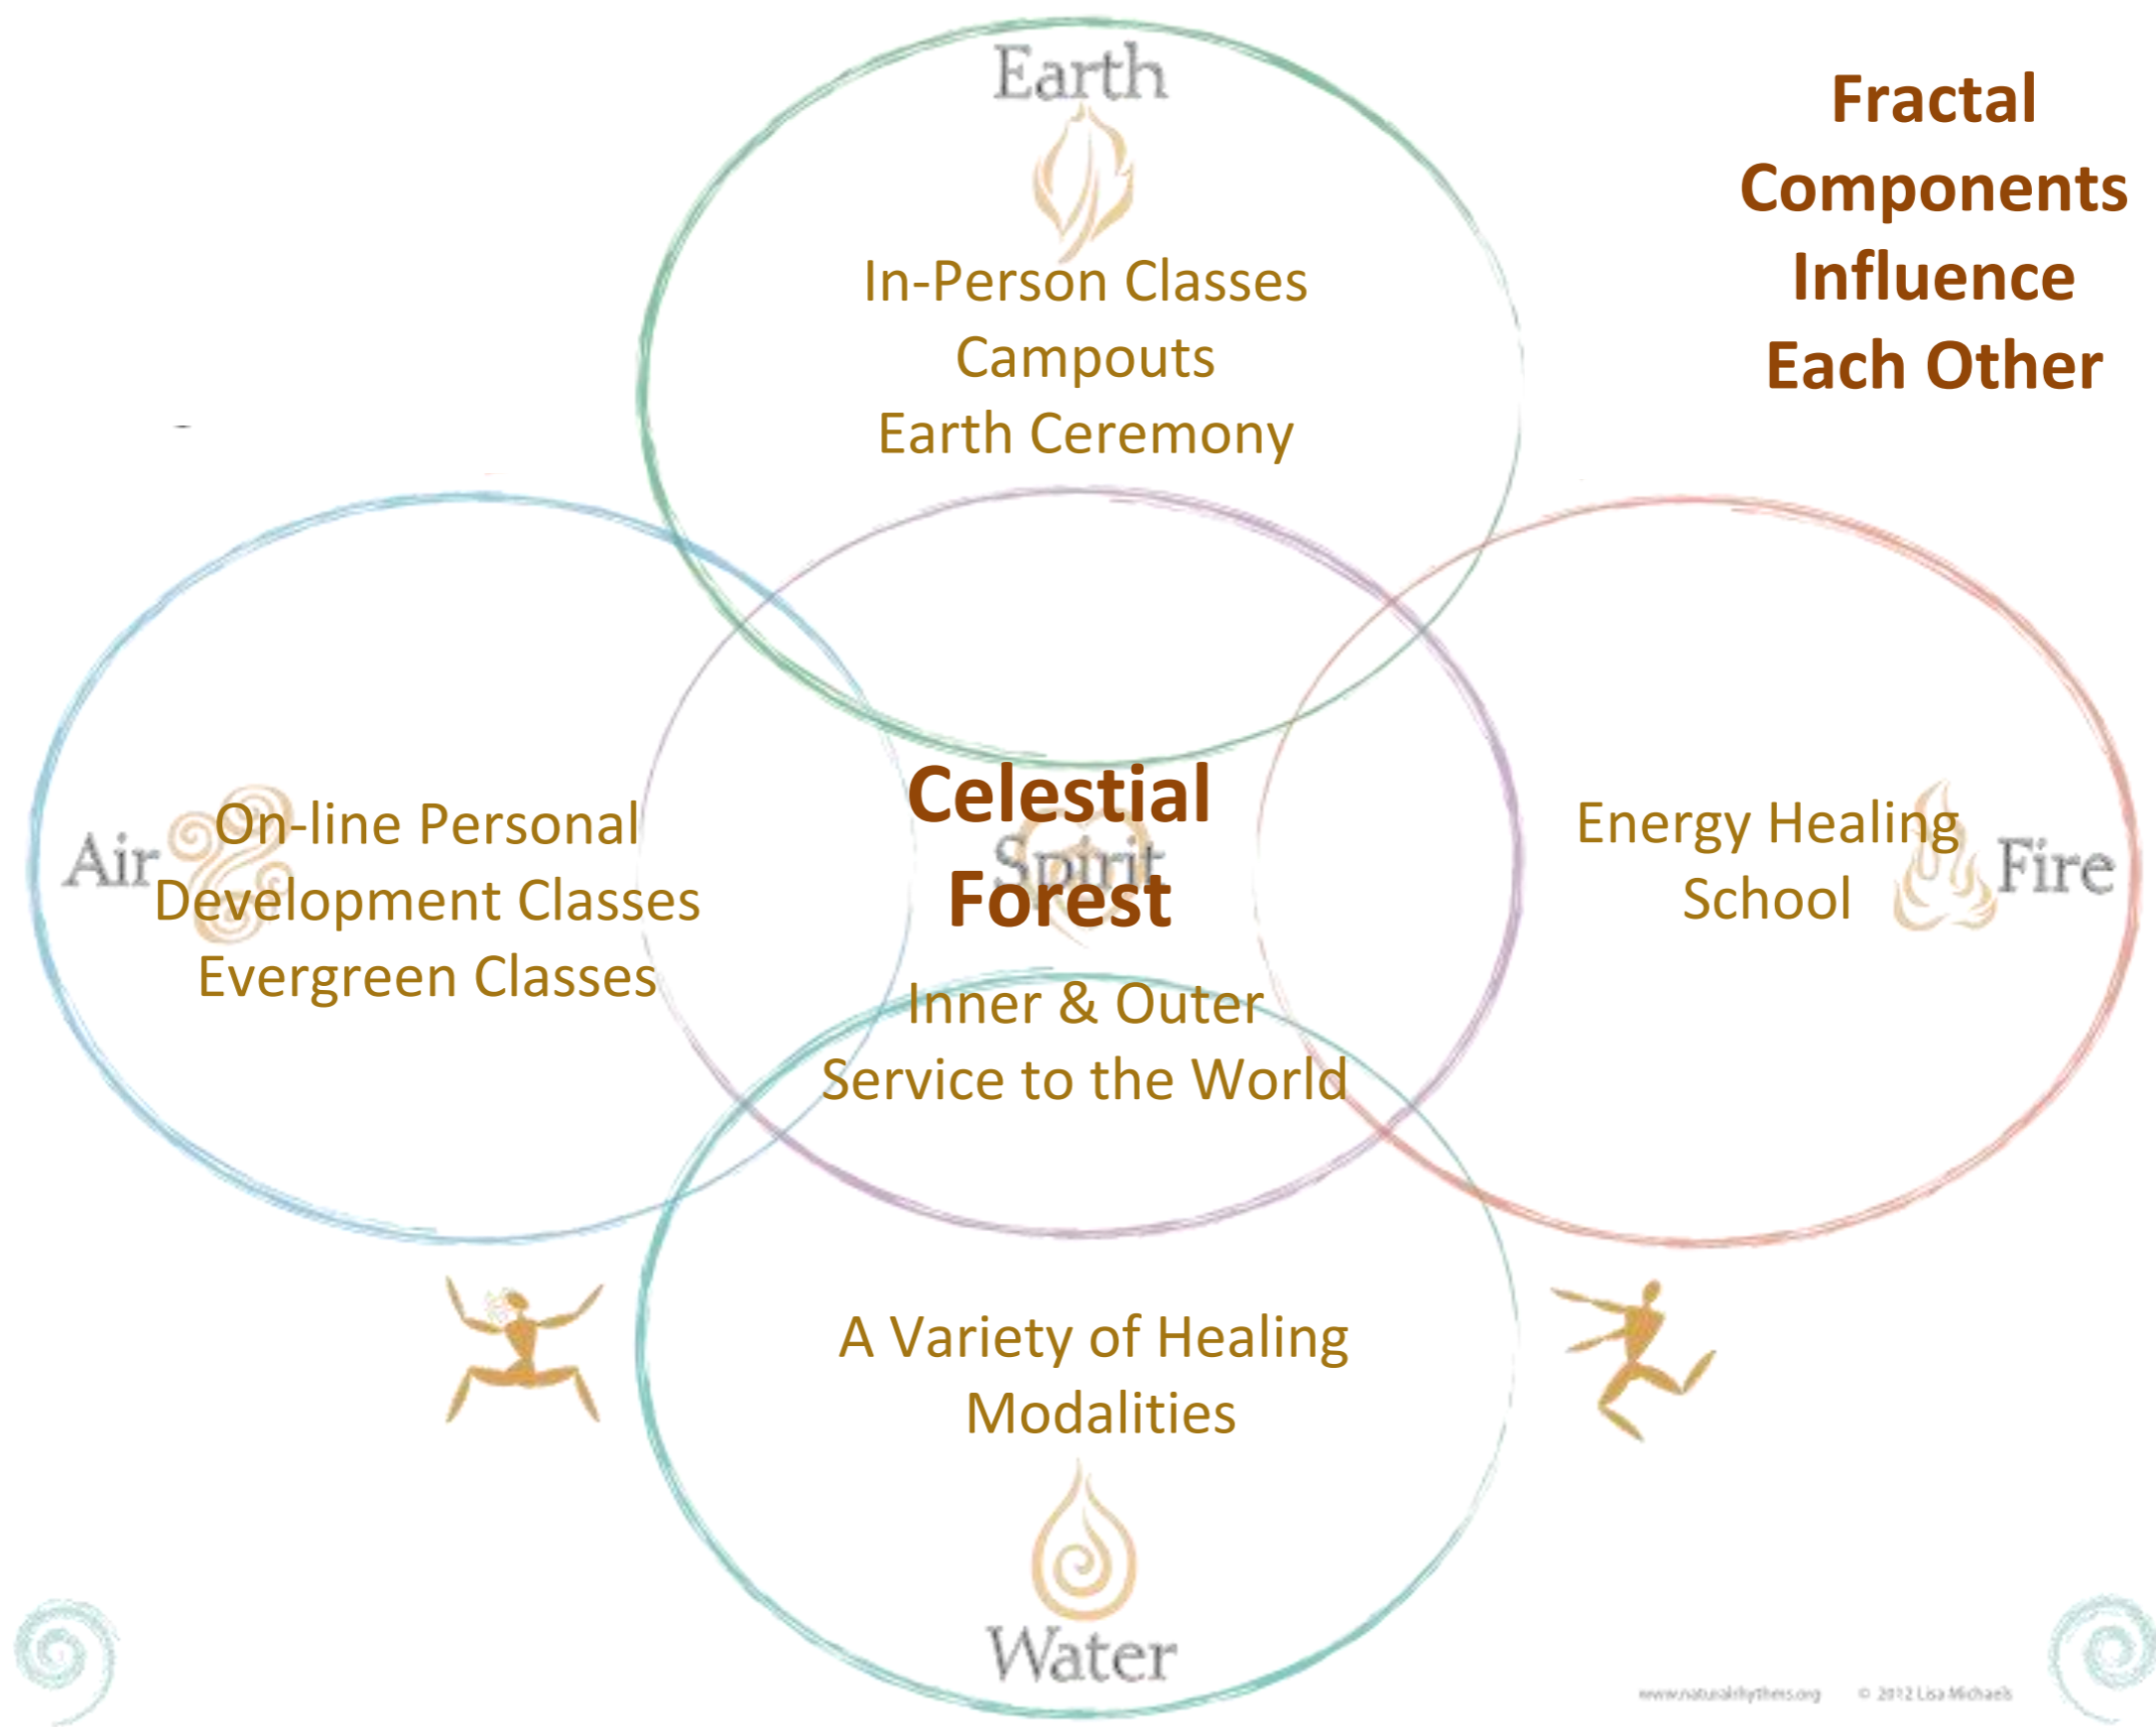

What are Fractals?

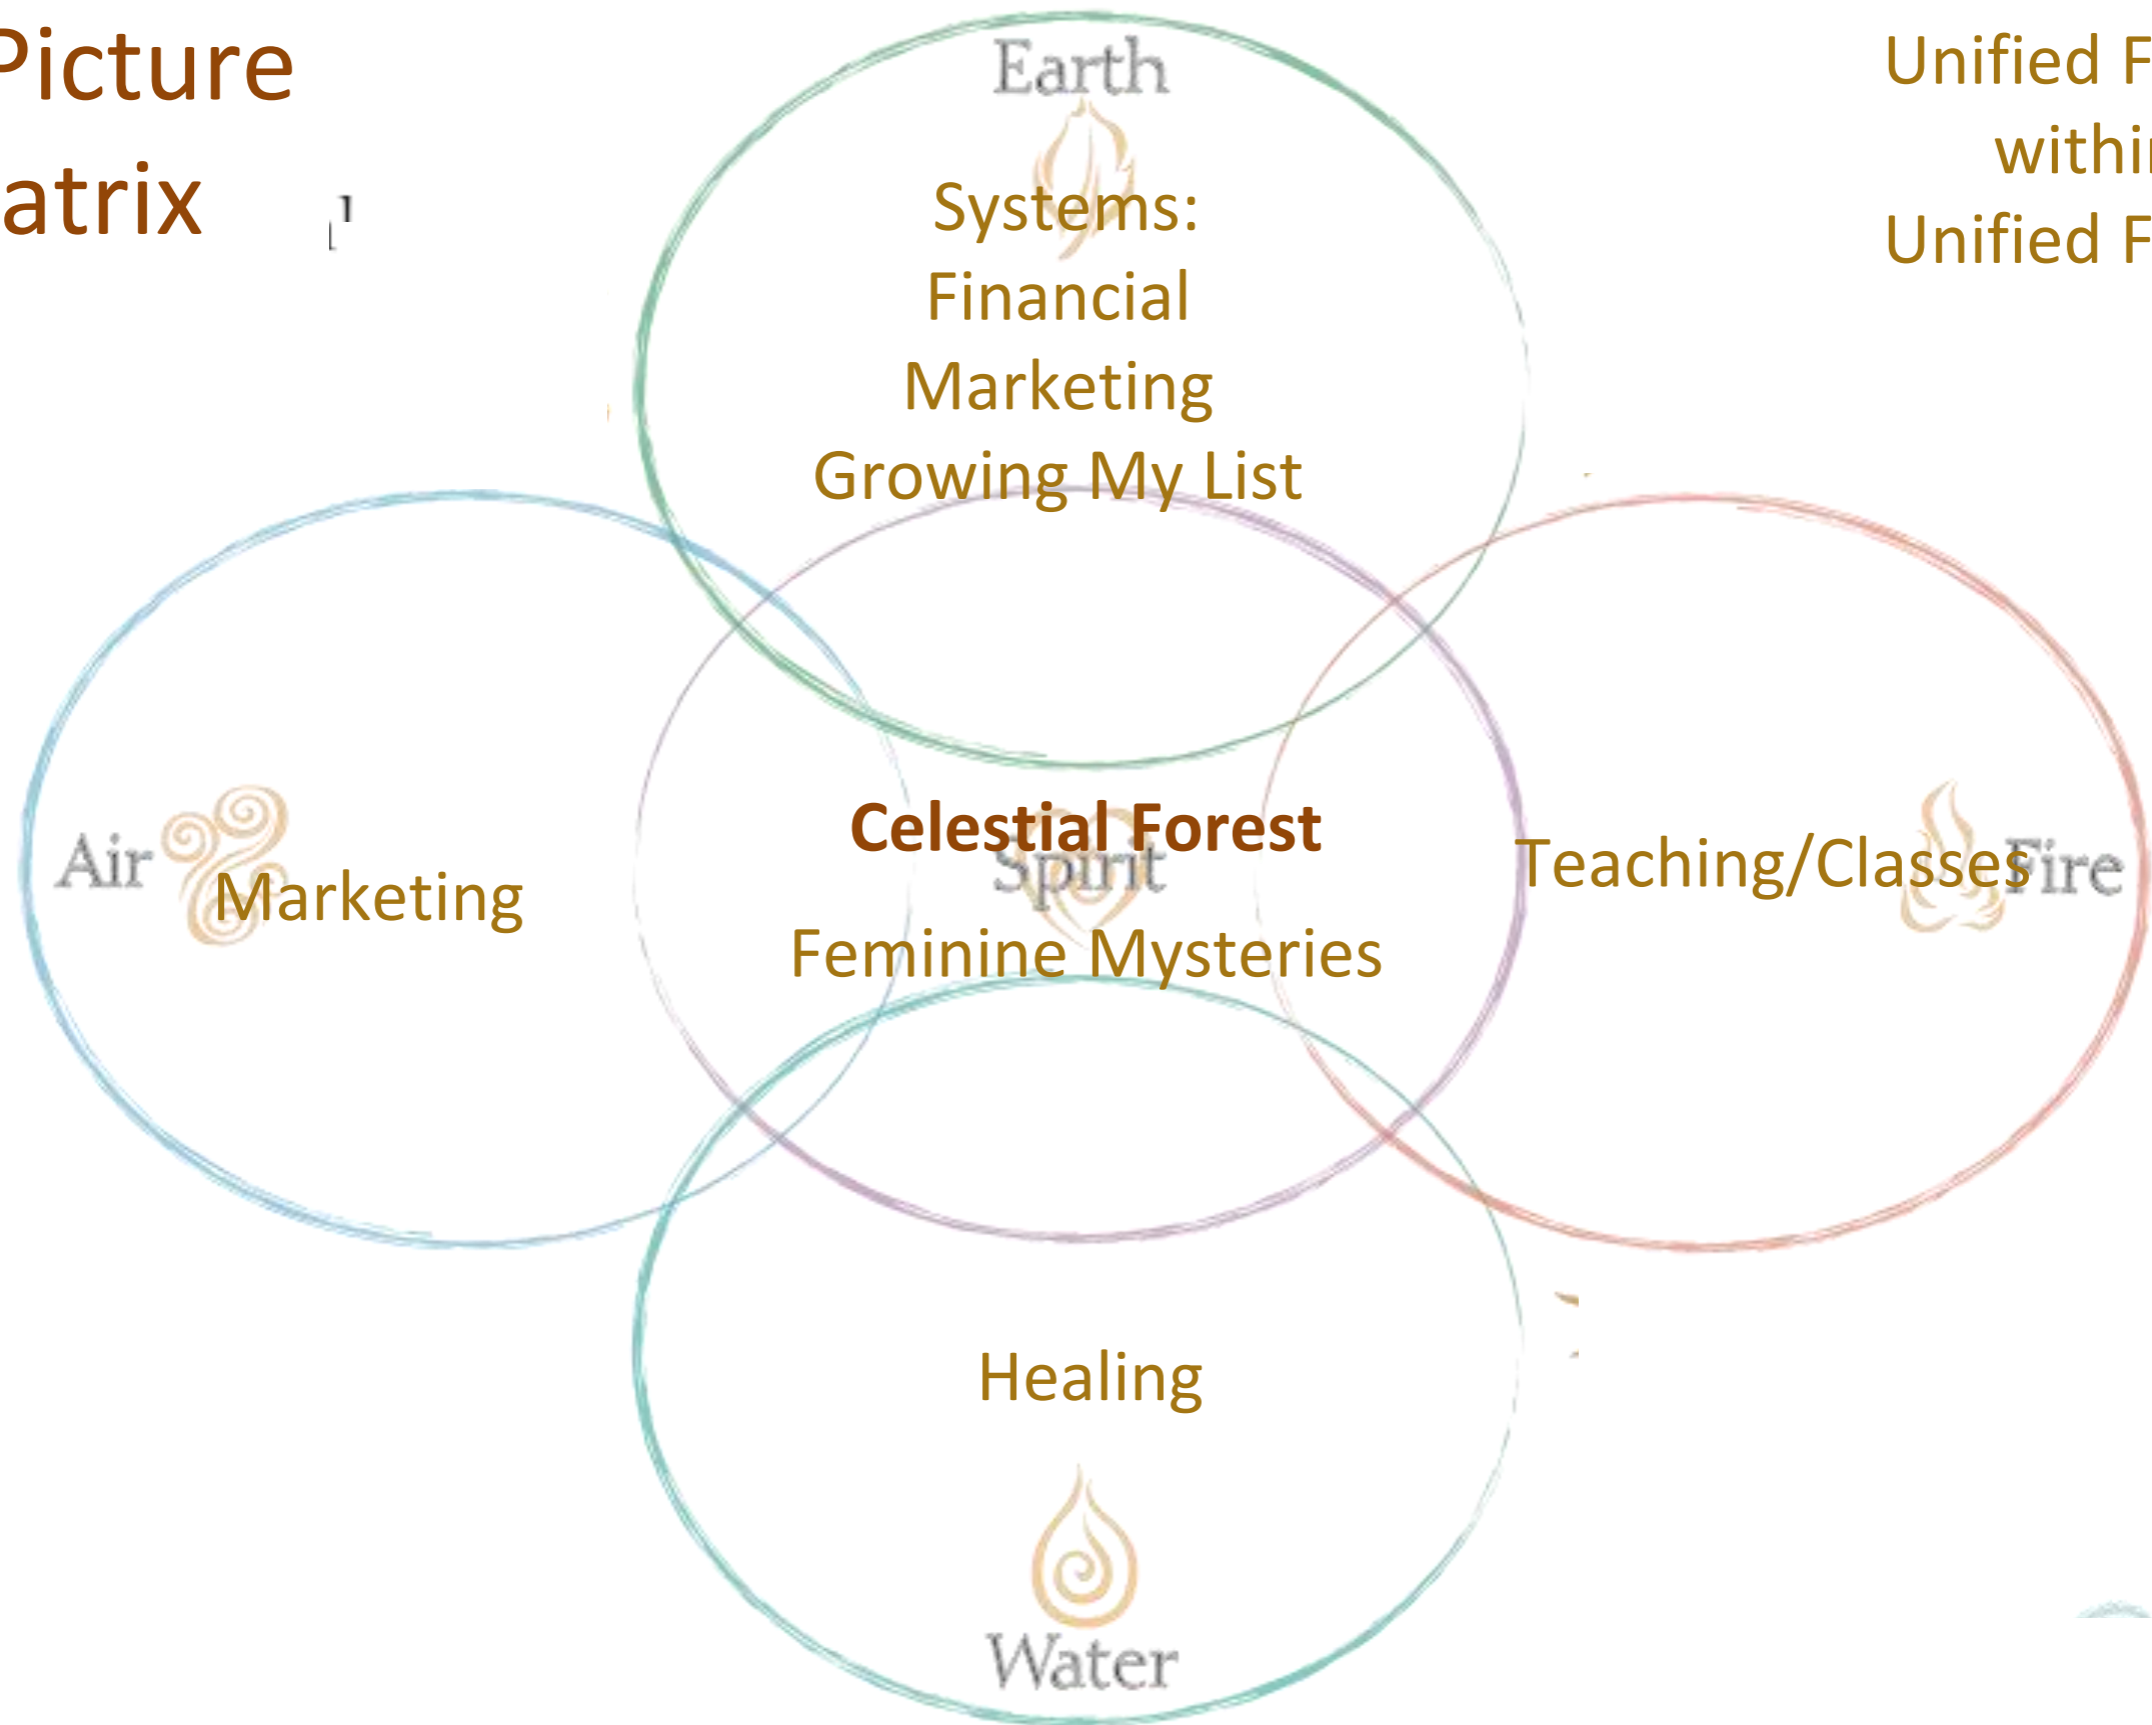

A fractal is a never-ending pattern. Fractals are infinitely complex patterns that are self-similar across different scales. They are created by repeating a simple process over and over in an ongoing feedback loop. Driven by recursion, fractals are images of dynamic systems – the pictures of Chaos. Geometrically, they exist in between our familiar dimensions. Fractal patterns are extremely familiar, since nature is full of fractals. For instance: trees, rivers, coastlines, mountains, clouds, seashells, hurricanes, etc. Abstract fractals – such as the Mandelbrot Set – can be generated by a computer calculating a simple equation over and over.

Unified Fields

We have to learn to harness the 16th Gift of Versatility in order to draw energy from a wide array of resources rather than drawing all the water from a single well.

True expansion always involves evolution. To the person who has embraced the high frequency of 53rd Gift, expansion is all you know. Your endeavors regularly outgrow their own forms, just as life regularly outgrows the forms that it inhabits.

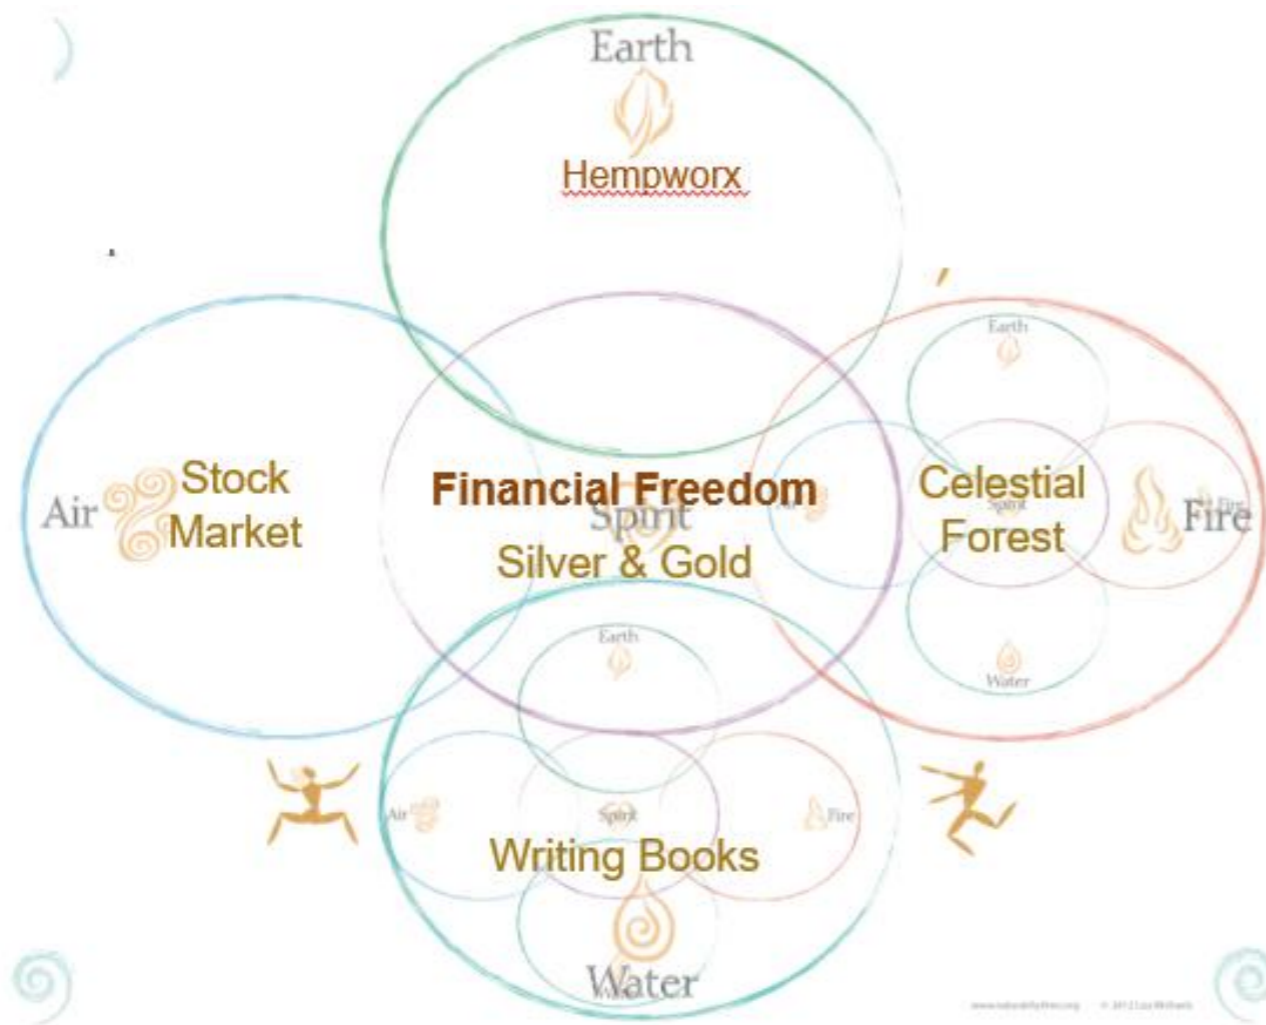

When you expand too much in a single direction, universal principles will cause the opposite of contraction. True expansion also embraces the notion of *fractal growth*.

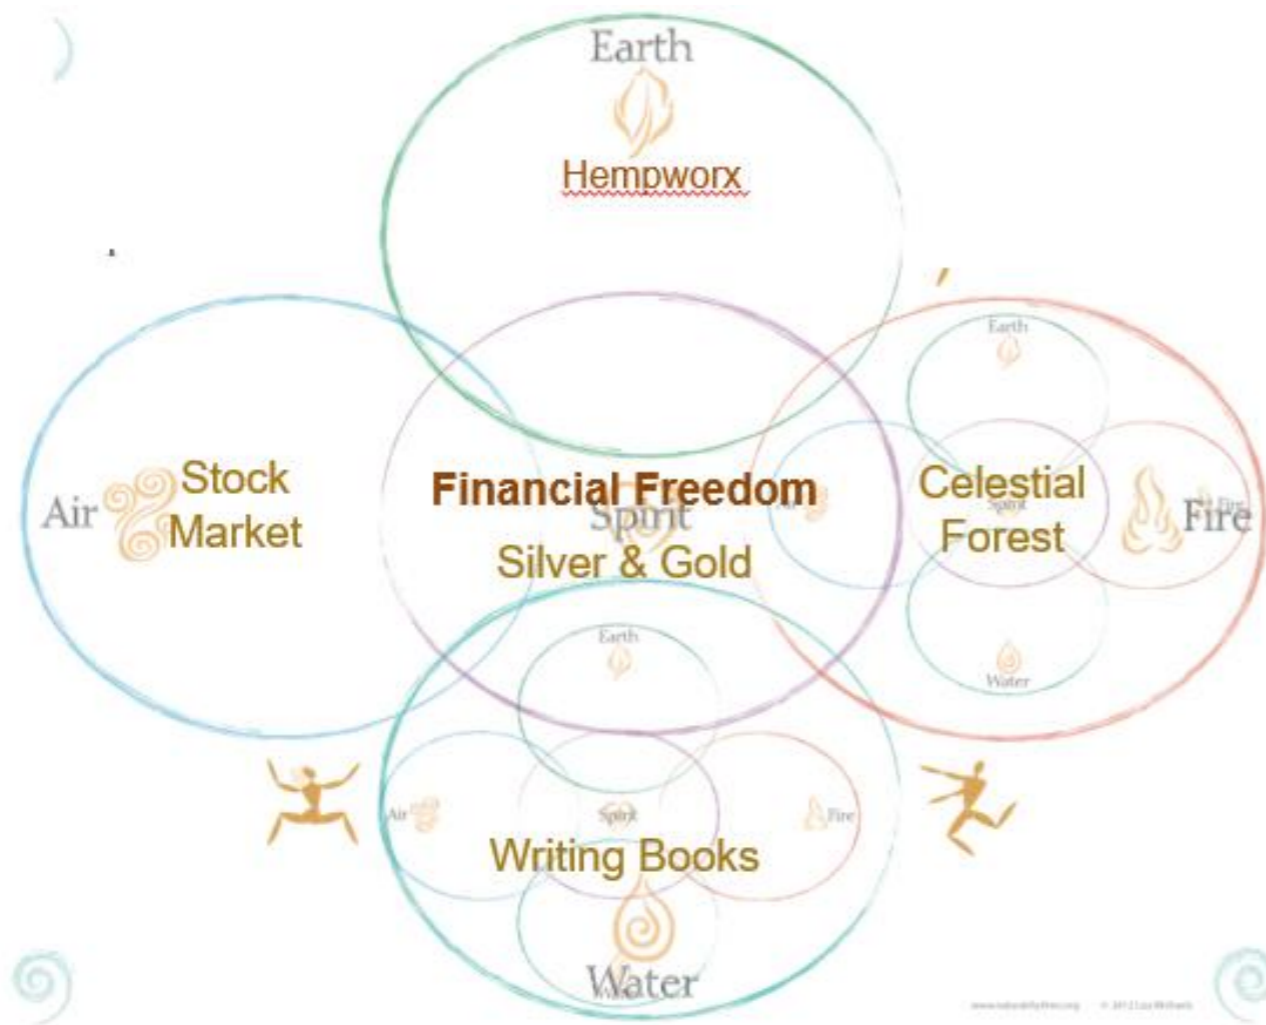

Fractal growth in business only occurs when the people within the business—who represent the consciousness of the organization—also evolve. True growth expands beyond its comfort zone—it is continually transcending its last level.

When this is allowed to happen, the business grows in many directions simultaneously rather than in a single direction.

It takes enormous trust to allow your life to truly expand because it appears to the mind to be more complex, whereas in fact it is moving into greater and greater synthesis.

On the other hand, the Shadow frequency, driven by greed, wants expansion without having to expand itself, which is why true expansion is actually relatively rare.

The wonder of expansion is that each new level of integration is built upon the levels that came before, which are thus included in the synthesis itself. This can be applied to any aspect of life, from computer science to business to spirituality. Expansion happens when consciousness is permitted to penetrate form in greater depth.
